EXP NO: 2 **AZURE DEVOPS PROJECT SETUP**

AIM:

To access the Azure portal and set up the Azure DevOps environment by creating a new organization.

PROCEDURE:

1. Open a web browser and navigate to the Azure portal.
2. Create an Azure account (if not already created) and log in using valid credentials.
3. Open Azure DevOps from the Azure portal.
4. Go to the **Organization Home page**.

Creating a New Project:

5. Click on **New Project**.
6. Enter the required project details:
    - **Name** (Example: LMS)
    - **Description**
    - **Visibility** (Public or Private)
7. Click on **Create** to create the project.

Selecting Organization:

8. Ensure the correct organization is selected.
9. If needed, switch the organization from the top-left corner.

Accessing Project Dashboard:

10. After project creation, open the **Project Dashboard**.

Managing User Stories:

11. From the left-side menu, click on **Boards**.
12. Click on **Add Work Item** or **+ (plus) button**.
13. Select **User Story** from the options.
14. Enter required details such as title, description, and priority.
15. Click **Save** to store the user story
