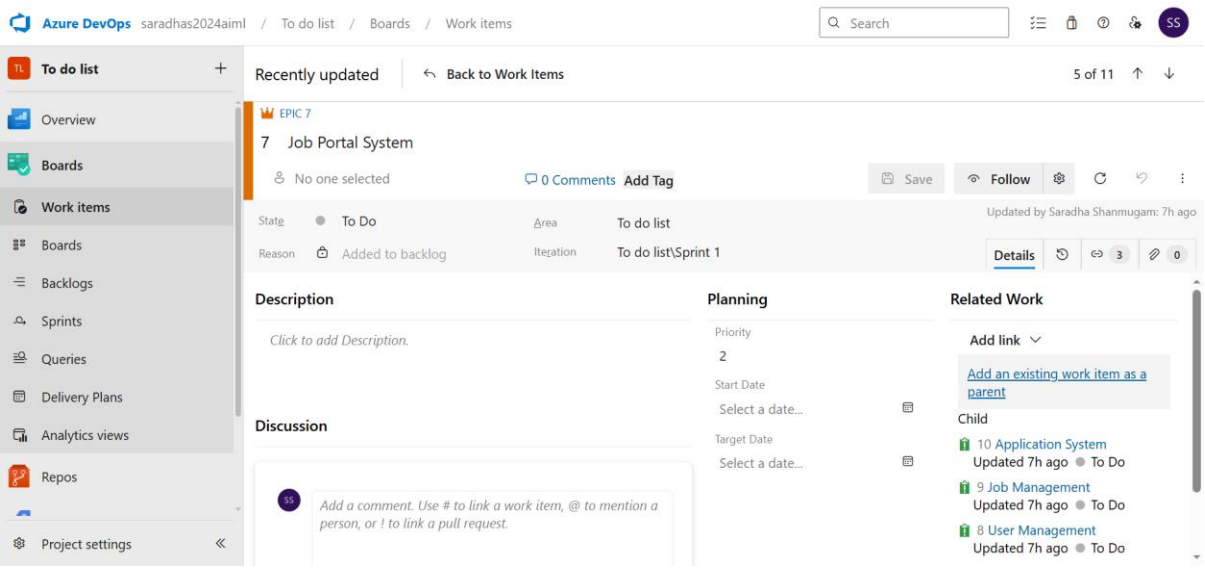
EXP NO: 3 – SETTING UP EPICS, FEATURES, AND USER STORIES

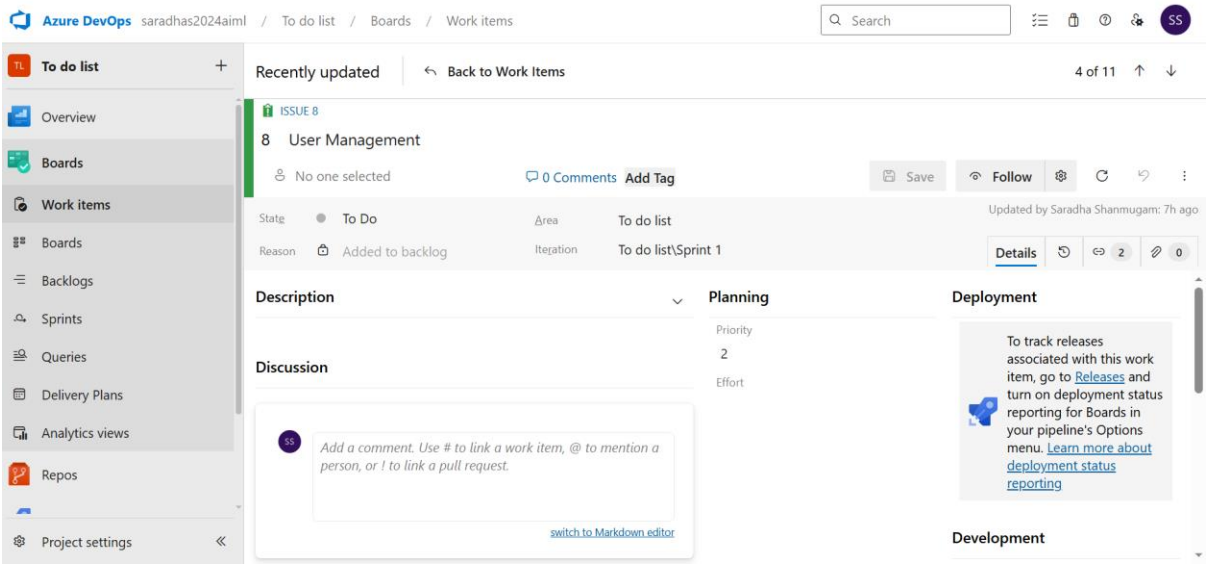
Aim

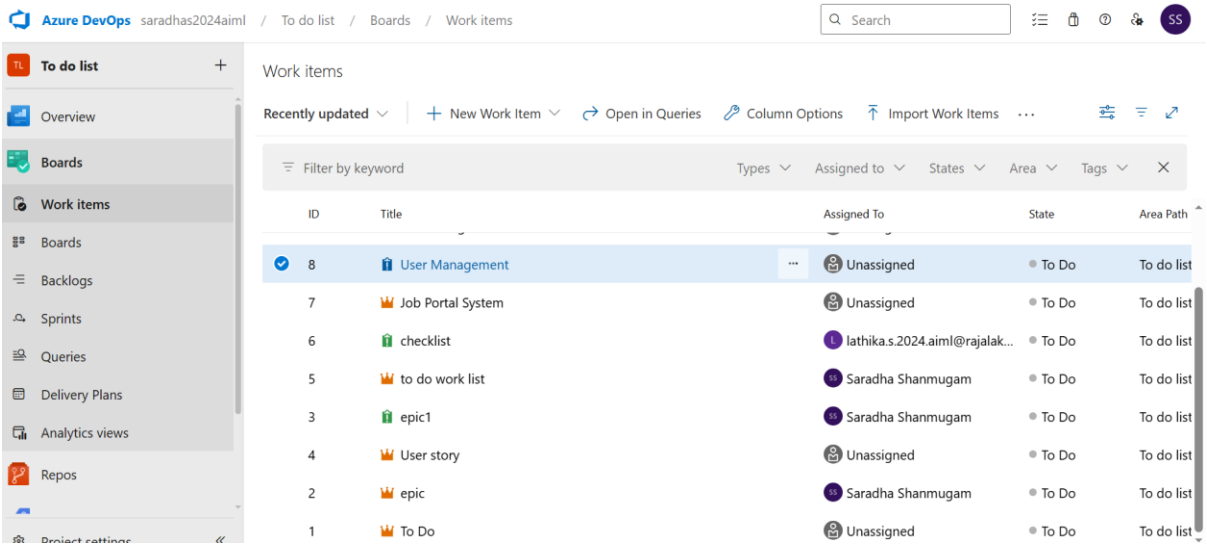
To understand and learn how to create **Epics, Features, User Stories, and Tasks** for effective project planning in software development.

Procedure

1. **Identify the Project Scope**
   Understand the overall project requirements and objectives.
2. **Define Epics**
   Break down the project into major modules called epics.
3. **Identify Features**
   Divide each epic into smaller functional components called features.
4. **Create User Stories**
   Write user stories in the format:
   "As a [user], I want to [action], so that [benefit]."
5. **Break into Tasks**
   Divide each user story into smaller actionable tasks.
6. **Organize Backlog**
   Arrange all epics, features, user stories, and tasks in a structured manner.
7. **Review and Refine**
   Verify completeness and make necessary improvements.







Result

Thus, the **Epics, Features, User Stories, and Tasks** for the given project have been successfully created and organized for effective project planning.
